CTPAT Program

Ampco Corporate Statement of Support

Customs-Trade Partnership Against Terrorism (“CTPAT”) is a voluntary public-private sector partnership program designed to achieve the highest level of cargo security through close cooperation between U.S. Customs and Border Protection (“CBP”) and the principal stakeholders of the international supply chain such as importers, carriers, consolidators, licensed customs brokers, and manufacturers.

Ampco has been certified by C-TPAT as complying with membership requirements. Part of the C-TPAT certification requires Ampco to identify which of its business partners are now or plan to be C-TPAT certified. For those business partners not eligible, they must demonstrate a commitment in meeting the security requirements appropriate to their business, including Container/Trailer Security (seals, inspections, and storage), Procedural Security, Physical Security, Personnel Security, Assess Control, Security and Treat Awareness Training.

A response to the Ampco “Supply Chain Security Questionnaire for External Business Partners” is required to evaluate your conformance and commitment to the C-TPAT recommendations. Additionally, we recommend you address those areas where your organization’s security program should be improved to conform to the C-TPAT requirements.

Your compliance with the C-TPAT security recommendations is expected and required. If your company is presently C-TPAT certified please indicate that and accept our request for SVI notification.

Please forward the requested C-TPAT information to compliance@ampcomfg.com

Respectfully,

AMPCO MANUFACTURERS INC.
